All: I have completed the JLA: Sakashita expanded 00001 batch. There were a few interesting docs in the mix (hitting an assortment of Top Level Issue categories)- I've summarized a handful below. The batch also contained Price Adjustment forms, invoices, etc.- (in many of these, it could not be determined whether CRTs were at issue), foreign language e-mails containing English versions of articles from industry publications like Digitimes & iSuppli, and a few Toshiba docs, which were probably captured here because they feature a Toshiba employee named "F.Sakashita." I will move on to a Kobayashi batch next. Thanks.
